

30. (NEW) An orally disintegrable tablet comprising:
- fine granules containing lansoprazole,
 - said granules having a core and at least one layer coating said core;
 - a sugar; and
 - a low-substituted hydroxypropylcellulose having 5 to 7 % by weight of hydroxypropoxyl groups;
- wherein said tablet is improved in chalky taste and has no roughness.
31. (NEW) The tablet of claim 30 wherein said fine granules are enteric-coated fine granules.
32. (NEW) An orally disintegrable tablet comprising:
- fine granules containing lansoprazole,
 - said granules having a core and at least one layer coating said core;
 - a sugar; and
 - a low-substituted hydroxypropylcellulose having 5 to 7 % by weight of hydroxypropoxyl groups;
- wherein said low-substituted hydroxypropyl cellulose is separate from said fine granules in said tablet;
- wherein said tablet is improved in chalky taste and has no roughness.
